Join the Coastal Observation and Seabird Survey Team (COASST) for a weekend course exploring seabird and waterfowl biology in the Bering Strait and Northwest Arctic. The course will feature researchers who work in the region, along with opportunities and resources for integrating related citizen science projects into curriculum.

Intended Audience: Upper elementary, middle and high school instructors.

One college course credit is available through UAF. Funding for travel, room and board available for a limited number of participants.

To register return a completed registration form to coasst@uw.edu.
